

ONEMED

SURGICAL INSTRUMENTS

Ophthalmic Instruments Since 1991

OVERVIEW

ONEMED has been manufacturing Micro Ophthalmic Instruments Since 1991 and continuously supplying to our Partners Worldwide to meet the precise demands of clinics and hospitals.

QUALITY

Following the International norms of quality, our checking process is very strict to ensure the consistency at our exports. Generally we use the Pakistan made high grade Stainless Steel and German/Japanese too, Titanium & Tungsten Carbide to provide the desired accuracy and effectiveness in our entire range.

TEAM

The link between management, engineers and workers is our style to make proper functional instruments with advice of professional Ophthalmologists.

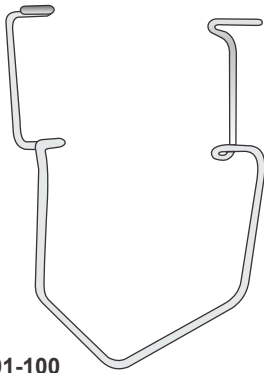

SERVICES

We regularly keep in touch with our worthy clients to exchange the production information and developments to achieve the international market competency.

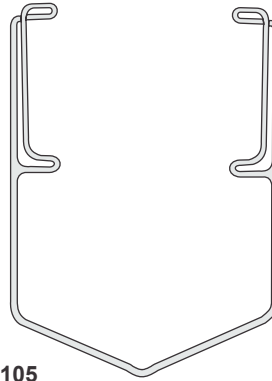

It's a tribute, our company get the Forging out side from Pakistan and systematically re-finish the Forceps & Scissors to re-export our partner. The stipulate deliveries are main focus by **ONEMED** to obtain the associates appreciation and it's our valid success.
